1.8 Systems of Linear Inequalities

Name _____ Period ____ Date _____

Algebra II 1.8 (30-minute plan) · Student sheet

I can…

- tell whether an ordered pair is a solution of a system of linear inequalities.
- graph a system of linear inequalities.
- write a system of linear inequalities from a graph or a real-life situation.

Vocabulary · fill in the missing word

System of linear inequalities — two or more linear inequalities in the same _____

Solution of a system — an ordered pair that makes every _____ true

Graph of a system — the region where the graphs of all the _____ overlap

Boundary line — _____ for < or >, solid for ≤ or ≥

Part 1 · Notes and examples (fill in each note, then work the example)

Solution of a system: A solution of a system makes _____ inequality true.

Example 1

Tell whether each point is a solution of the system $y \geq x + 1$ and $y < -2x + 5$.

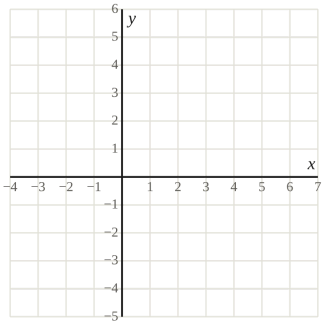

a. (1, 2) b. (3, 0)

Boundary lines: Dashed line for _____; solid line for _____.

Graph of a system: The graph of the system is the region where the shadings _____.

Example 2

Graph the system $y > x - 2$ and $y \leq -x + 4$. Name one solution.

Part 2 · Partner practice

Partner practice

Is $(-1, 4)$ a solution of $y > -x + 2$ and $y \le 3x + 8$?
