6.4 The Triangle Midsegment Theorem

Name _____ Period ___ Date _____

Geometry 6.4 (30-minute plan) · Exit ticket

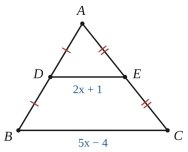

1.

$\overline{DE}$ is a midsegment of $\triangle ABC$. If BC = 18, what is DE?

2.

$\overline{DE}$ is a midsegment of $\triangle ABC$. DE = 2x + 1 and BC = 5x − 4. Find x and the length of DE.
