8.2 Proving Triangle Similarity by AA

Name _____ Period ___ Date _____

Geometry 8.2 (30-minute plan) · Exit ticket

1.

△ABC has angles of 52° and 61°. △DEF has angles of 61° and 67°. Are the triangles similar? Explain.

2.

In △ABC, $\overline{DE} \parallel \overline{BC}$ with D on $\overline{AB}$ and E on $\overline{AC}$. AD = 4, AB = 10, and DE = 6. Find BC.
