12.5 Volumes of Pyramids and Cones

Name _____ Period ____ Date _____

Geometry 12.5 (30-minute plan) · Student sheet

I can…

- find the volume of a pyramid.
- find the volume of a cone.
- find the volume of a composite solid.

Vocabulary · fill in the missing word

Height of a pyramid or cone — the _____ distance from the vertex to the plane of the base

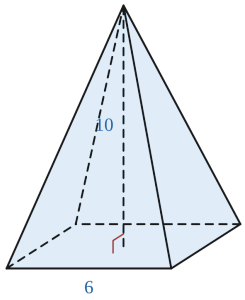

Composite solid — a solid made up of two or more _____

Part 1 · Notes and examples (fill in each note, then work the example)

Volume of a pyramid: V = _____ Bh

Example 1

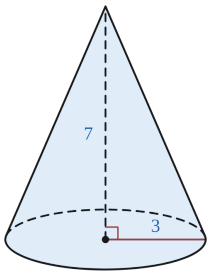

Find the volume of the square pyramid.

Volume of a cone: V = _____

Example 2

Find the volume of the cone. Round to the nearest hundredth.

Composite solids: find the volume of each part, then _____ (or subtract a part that is removed).

Example 3

A grain silo is a cylinder with a radius of 3 meters and a height of 10 meters, topped by a cone with a height of 4 meters. Find its volume. Round to the nearest hundredth.

Part 2 · Partner practice

Partner practice

A cone has a diameter of 8 and a height of 9. Find its volume. Round to the nearest hundredth.
