4.2 Adding, Subtracting, and Multiplying Polynomials

Name _____ Period ____ Date _____

Algebra II 4.2 (30-minute plan) · Student sheet

I can…

- add and subtract polynomials.
- multiply polynomials, including three binomials.
- use special product patterns and Pascal's Triangle.

Part 1 · Notes: fill in the blanks

To subtract, distribute the minus sign to _____ term.

$(a + b)^3$ = _____

Row n of Pascal's Triangle gives the coefficients of _____.

Part 2 · Examples (work them with the class)

Example 1

Find the product: $(x - 2)(3x^2 + x - 4)$

Example 2

Find the product: $(x + 1)(x - 3)(x + 2)$

Part 3 · Partner practice

Partner practice

Find the product: $(x + 3)(x - 1)(x - 2)$
