1.3 Using Midpoint and Distance Formulas

Name _____ Period ___ Date _____

Geometry 1.3 · Exit ticket

1.

Find the midpoint of the segment with endpoints (−4, 7) and (6, −1).

2.

M(3, −2) is the midpoint of $\overline{AB}$ and A is (1, 4). Find B.

3.

Find the distance between (−3, 1) and (5, 7).
