1.5 Solving Linear Systems

Name _____ Period ___ Date _____

Algebra II 1.5 · Exit ticket

1.

Is (1, 2, 3) a solution of $x + y + z = 6$, $2x - y + z = 3$, and $x + y - z = 0$?

2.

Solve: $x = 4$, $x + y = 7$, $x + y + z = 10$

3.

What does it mean when elimination gives $0 = 5$?
