9.6 Making Inferences from Experiments

Name _____ Period ___ Date _____

Algebra II 9.6 · Exit ticket

1.

The treatment mean is 52 and the control mean is 47. Find the experimental difference.

2.

In 100 resamplings, 45 differences were as large as the observed difference. What should you conclude?

3.

How many ways can 8 values be divided into two groups of 4?
