4.3 Writing Equations in Standard Form

Name _____ Period ____ Date _____

Algebra I 4.3 · Student sheet

I can…

- write equations in standard form.
- write equations of horizontal and vertical lines.
- use linear equations in standard form to solve real-life problems.

Part 1 · Ticket sales

A play earns $600 from adult tickets ($8, x) and student tickets ($5, y).

Equation: _____ x-intercept: _____ (means: _____)

y-intercept: _____ (means: _____)

Two more combinations that earn exactly $600: _____

Part 2 · Notes: fill in the blanks

Standard form: _____, with integer coefficients.

Clear fractions by _____ every term.

Horizontal line through (a, b): _____. Vertical: _____.

Part 3 · Examples (work them with the class)

Example 1

Write an equation in standard form of the line through (3, −1) with slope −2.

Example 2

Write an equation in standard form of the line through (−1, 2) and (3, 4).

Example 3

Write equations of the horizontal and vertical lines through (−4, 6).

Example 4

You spend $36 on paint ($6 per quart) and brushes ($4 each). Write an equation in standard form, and find how many brushes you buy with 4 quarts.

Part 4 · Partner practice

Partner 1

Write $y = -\frac{3}{4}x + 2$ in standard form.

Partner 2

Find A so that the graph of $Ax + 3y = 12$ passes through (2, 2).
