10.1 Lines and Segments That Intersect Circles

Name _____ Period ___ Date _____

Geometry 10.1 · Exit ticket

1.

A tangent segment from point P touches a circle of radius 6 at point T. PT = 8. How far is P from the center?

2.

Two tangent segments from the same point have lengths 5x − 3 and 2x + 9. Find x.

3.

A circle has radius 8. A segment from a point on the circle is 15 long, and its far end is 17 from the center. Is the segment tangent?
